INDEX

Balabani, S. *See* Konstantinidis, Balabani & Yianneskis

Ben Amar, M. *See* Sultan, Boudaoud & Ben Amar

Bharadwaj, R. & Santiago, J. G. Dynamics of field-amplified sample stacking, 57–92

Bickle, M. *See* Lyle, Huppert, Hallworth, Bickle & Chadwick

Bocquet, L. *See* Rosellini, Hersen, Clanet & Bocquet

Boudaoud, A. *See* Sultan, Boudaoud & Ben Amar

Bridges, T. J. & Laine-Pearson, F. E. The long-wave instability of short-crested waves, via embedding in the oblique two-wave interaction, 147–182

Burroughs, E. A., Coutsias, E. A. & Romero, L. A. A reduced-order partial differential equation model for the flow in a thermosyphon, 203–237

Chadwick, A. *See* Lyle, Huppert, Hallworth, Bickle & Chadwick

Clanet, C. *See* Rosellini, Hersen, Clanet & Bocquet

Coutsias, E. A. *See* Burroughs, Coutsias & Romero

Ehrenmark, U. T. An alternative dispersion equation for water waves over an inclined bed, 249–266

Elghobashi, S. *See* Ferrante & Elghobashi

Ferrante, A. & Elghobashi, S. Reynolds number effect on drag reduction in a microbubble-laden spatially developing turbulent boundary layer, 93–106

Gu, L. & Lawrence, G. A. Analytical solution for maximal frictional two-layer exchange flow, 1–17

Hallworth, M. *See* Lyle, Huppert, Hallworth, Bickle & Chadwick

Hersen, F. *See* Rosellini, Hersen, Clanet & Bocquet

Howe, M. S. Sound produced by a vortex interacting with a cavitated wake, 333–342

Huppert, H. E. *See* Lyle, Huppert, Hallworth, Bickle & Chadwick

Koehler, R. *See* Leneweit, Koehler, Roesner & Schäfer

Konstantinidis, E., Balabani, S. & Yianneskis, M. The timing of vortex shedding in a cylinder wake imposed by periodic inflow perturbations, 45–55

Koseff, J. R. *See* Troy & Koseff

Laine-Pearson, F. E. *See* Bridges & Laine-Pearson

Lawrence, G. A. *See* Gu & Lawrence

Leneweit, G., Koehler, R., Roesner, K. G. & Schäfer, G. Regimes of drop morphology in oblique impact on deep fluids, 303–331

Lyle, S., Huppert, H. E., Hallworth, M., Bickle, M. & Chadwick, A. Axisymmetric gravity currents in a porous medium, 293–302

Ogilvie, G. I. Wave attractors and the asymptotic dissipation rate of tidal disturbances, 19–44

Peltier, W. R. *See* Stastna & Peltier

Pritchard, D. On fine sediment transport by a flood surge, 239–248

Roesner, K. G. *See* Leneweit, Koehler, Roesner & Schäfer

Romero, L. A. *See* Burroughs, Coutsias & Romero

Rosellini, L., Hersen, F., Clanet, C. & Bocquet, L. Skipping stones, 137–146

Santiago, J. G. *See* Bharadwaj & Santiago
